## WHY BY LOCALLY GROWN PRODUCE?

1. Farmers' Market produce is picked ripe and sold that day, just hours off the vine (not days). You can taste the difference!
2. You can meet the farmers who grow your food, ask when it was picked, how it was grown. Kids love learning from the Farmers!
3. You'll find unusual varieties of fruits and vegetables – those bred for flavor, not uniform in size, or ability to travel.
4. Buying locally grown produce encourages regional farming. If farming were more widespread, we could save fuel and resources spent on long distance shipping and reduce our overdependence on a handful of growing regions that may not be able to produce high yields indefinitely.
5. When produce is grown and purchased locally, the money remains in the community and stimulates the local economy.
